DETAILED ACTION

Drawings

1. The drawings are objected to because handwritten drawings of reference figures and numerals are difficult to distinguish. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

Art Unit: 2634

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

3. The abstract of the disclosure is objected to because it contains less than 50 words and does not describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details. Correction is required. See MPEP § 608.01(b).

4. The disclosure is objected to because of the following informalities:

a. On page 3, line 4, "First signal combiner means" is suggested to be changed to "The first signal combiner means".

b. On page 3, line 9, "Second signal combiner means" is suggested to be changed to "The second signal combiner means".

c. On page 3, line 15, "Third signal combiner means" is suggested to be changed to "The third signal combiner means".

d. On page 7, lines 18-21, it is suggested that the applicant complete the application numbers.

Appropriate correction is required.

Claim Objections

5. Claims 1-17 are objected to because of the following informalities: In claims 1, 11, and 12, "AC" is suggested to be changed to "alternating current (AC)". Appropriate correction is required.

Allowable Subject Matter

6. Claims 1-17 are allowable over prior art (if above objections are overcome) because related references do not disclose delaying and differentiating a signal and combining this signal with a slicer error signal to provide a control signal with zero AC signal component to the timing control of decision feedback (equalization) circuitry.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. D' Oreye de Lantremange (U. S. Patent No. 6, 141, 378) discloses adaptively controlling a pre-slicer data signal that is sliced to provide a post-slicer data signal.

8. This application is in condition for allowance except for the following formal matters:

See objection above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte*
Quayle, 1935 C.D. 11, 453 O.G. 213.

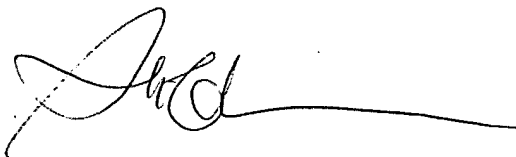

A shortened statutory period for reply to this action is set to expire **TWO MONTHS**
from the mailing date of this letter.
